

# Mr. Juntao YAO

juntaoyao@ufl.edu

PhD Candidate, Focusing on Power Electronics and EMI Solutions

001-3523285405

Research Assistant, Power Electronics and Electrical Power Research Lab (PEEPRL),

Address: 111, Larsen Hall, ECE Department, University of Florida, Gainesville, FL, 32611

## Education

- PhD, Electrical Engineering, University of Florida, 2017-2021, Advisor: Dr. Shuo Wang  
Thesis: Modeling and Reduction of Radiated Electromagnetic Interference in Power Converters
- MS, Electrical Engineering, Wuhan University, 2013-2016, Advisor: Dr. Fei Liu & Dr. Xiaoming Zha  
Thesis: Operational Control for Photovoltaic-Storage based DC Microgrid
- BS, Electrical Engineering, Wuhan University, 2009-2013, GPA 3.66/4 (89/100), Ranking 22/392  
Thesis: Compound Repetitive Control for LCL-filter based Active Power Filter

## Skills

- **EMI Solutions for Power Electronics Systems** including conducted and radiated EMI in non-isolated and isolated power converters, in consumer electronics and automotive electronics, by improving the component (e.g. switching transformers, EMI filters) design and the PCB layout
- **Finite Element Simulation** in ANSYS Maxwell, Q3D, HFSS, and CST
- **Circuit Simulation** in Matlab Simulink, PSPICE, Saber, PSIM, and SIMPLIS
- **Programming** in Matlab, Code composer studio, Web development, Python, and Latex
- **Hardware-PCB design** in Altium Designer, design of switching power supplies and the components, and testing using vector network analyzer, impedance analyzer, spectrum analyzer, power analyzer, oscilloscope, signal generator, etc.
- Familiar with TI DSP F28335

## Research Experiences

### Power Electronics and Electrical Power Research Lab (PEEPRL), University of Florida

- **EMI in Power Converters in Automotive Applications** Aug. 2018 -Present  
*Sponsored by Monolithic Power Systems, Inc. San Jose, CA, USA*
  - Modeling of EMI in automotive DC-DC power converters including the analyses of switching noise sources, components, PCB layouts, and antennas
  - Developed a virtual lab for EMI predictions. With the PCB file imported to ANSYS/Q3D and ANSYS/HFSS, the parasitics in the power converter and the coupling parasitics between power converter and power cables are extracted. The radiation characteristics of the antenna consisting of power cables are extracted. The radiated EMI of the power converter system is predicted to emulate the testing in a semi-anechoic chamber.
  - Proposed EMI solutions by PCB layout improvement, capacitor improvement and near field coupling mitigation
- **Radiated EMI in GaN IC-based Active Clamp Flyback Adapters** Mar. 2018 - Oct. 2019  
*Sponsored by Navitas Semiconductor, Inc. El Segundo, CA, USA*
  - Modeling of radiated EMI in GaN IC-based active clamp flyback adapters
  - Developed a finite element simulation model of the planar transformer based on ANSYS HFSS
  - Analyzed and mitigated near field couplings' impact on the radiated EMI
  - Proposed radiated EMI solutions based on improved shielding and EMI filter techniques, and the improved PCB layout
- **EMI in Flyback Adapters** Jan. 2017 - Dec. 2017  
*Sponsored by Huawei Technologies*
  - Conducted and radiated EMI modeling including switching noise sources, the transformer, EMI filter components and the antenna

- EMI reduction by improving the transformer design, the snubber, and the inductors
- Improved the transformer winding structure based on the coaxial shielding technique

## Center for Grid Power Electronics, Wuhan University

- **DC Microgrid** Sep. 2014 - June 2016  
*Sponsored by Smart Grid Research Institute of State Grid*
  - Established a simulation model consisting of a grid-connected converter, a PV panel and loads
  - PCB layout of a grid connected converter
- **Regenerative Bidirectional Cascaded Multilevel Converter** June 2013 - June 2015  
*Sponsored by National Natural Science Foundation of China*
  - Designed the hybrid power cell configuration
  - Proposed a method to estimate the power recycling capacity
- **Shunt Active Power Filter** Nov. 2012 - Aug. 2013  
*Bachelor thesis (Province-level honor)*
  - Established an APF simulation model with a LCL filter
  - Proposed a multi-internal-model based repetitive controller robust to frequency fluctuation

## Publications

### Journal papers

1. **J. Yao**, S. Wang and H. Zhao, "Measurement Techniques of Common Mode Currents, Voltages, and Impedances in a Flyback Converter for Radiated EMI Diagnosis," in IEEE Transactions on Electromagnetic Compatibility, vol. 61, no. 6, pp. 1997-2005, Dec. 2019.
2. **J. Yao**, Y. Li, S. Wang, X. Huang, and X. Lyu, "Modeling and Reduction of Radiated EMI in a GaN IC-based Active Clamp Flyback Adapter," submitted to IEEE Transactions on Power Electronics. (Under Review)

### Conference papers

## Patents

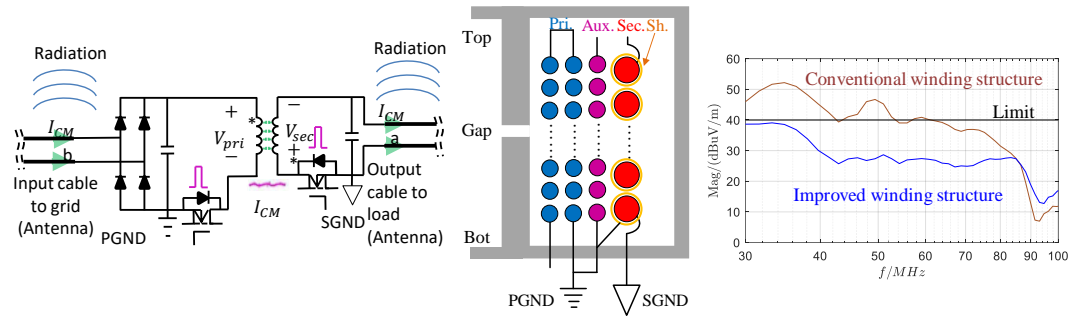

1. S. Wang, **J. Yao** and Y. Li, "New Common Mode (CM) Electromagnetic Interference (EMI) Filters for Reducing Radiated EMI in Power Converters," U.S. Patent, 62/950,268, Dec. 19, 2019 (Pending, U.S. patent)
2. Y. Xiong, F. Zhu, **J. Yao**, H. Yang, F. Liu. "A Rectifier-fed Cascaded Multilevel Converter for Dual Motor Drive," China Patent, CN204859024U, Aug. 24, 2015. (Issued)
3. F. Zhu, Y. Xiong, **J. Yao**, H. Yang, F. Liu. "A Symmetrical Three Port Cascaded Power Converter for Dual High Power Motor Drive," China Patent, CN204906233U, July 28, 2015. (Issued)
4. F. Liu, **J. Yao**, Y. Wang, K. Feng, C. Huang, X. Zha. "A Repetitive Controller with Multiple Internal Models Considering the Frequency Deviation of the Power System," China Patent, CN104836233A, May. 25, 2015. (Issued)
5. **J. Yao**, K. Deng, F. Liu, J. Gong, L. Xiong, X. Zha. "Partial Bidirectional Cells based Regenerative Cascaded Multilevel Converter and the Optimized Configuration of the Regenerative Cells", China Patent, CN104104240B, July 25, 2014. (Issued)
6. F. Liu, X. Lai, K. Deng, **J. Yao**, J. Sun, Y. Li. "A Solid-state Electronic Switch Based Short Circuit Protection Method for DC Microgrids," China Patent, CN103928912B, May. 8, 2014. (Issued)
7. F. Liu, X. Zha, K. Deng, **J. Yao**, J. Gong. "A Cascaded Multilevel Converter without Active Front for Dual Motor Drives," China Patent, CN103944439A, Apr. 28, 2014. (Issued)
8. **J. Yao**, G. Huang, C. Liu, W. Lyu, Y. Li, F. Liu, X. Zha. "A DC Microgrid," China Patent, CN202586339U, May. 18, 2012. (Issued)
9. G. Huang, **J. Yao**, C. Liu, W. Lyu, Y. Li, F. Liu, X. Zha. "Low-voltage Bipolar DC Micro-power Grid," China Patent, CN202586340U, May. 18, 2012. (Issued)
10. J. Sun, X. Zha, Y. Li, W. Lyu, C. Liu, G. Huang, **J. Yao**. "A Three Wire DC Microgrid System and Control Method for Modern Buildings," China Patent, CN102593832B, Mar. 15, 2012. (Issued)

## Honors and Awards

- Excellent master graduate(Top 3%) , Wuhan University, 2016
- First-class scholarship, Wuhan University, 2014
- Excellent bachelor thesis of Hubei province(Top 2%), 2013
- Excellent graduate(Top 3%) , Wuhan University, 2013
- Honorable mention, US Mathematical Contest in Modeling/Interdisciplinary Contest in Modeling (US ICM/MCM), 2012
- All-round excellent student(Top 5%), Wuhan University, 2012
- Outstanding student leader, Wuhan University, 2012
- National encouragement scholarship(Top 5%), 2012
- 3<sup>rd</sup> Prize in the National Electrician Mathematical Modeling Contest, 2011
- Award for creative researcher, Wuhan University, 2011
- National encouragement scholarship(Top 5%), 2011

## Appendix: Innovation Highlights

### Project I: In Flyback Converters, Transformer Structure Optimization for Radiated EMI Reduction

Radiated EMI in the flyback converter with power cables attached

Optimized transformer structure with improved coaxial shielding

Radiated EMI

With the transformer optimized, radiated EMI is brought to compliance with the standard.

### Project II: Radiated EMI in GaN IC-based Active Clamp Flyback Adapters

The proposed CLC filter combined with the shielding technique

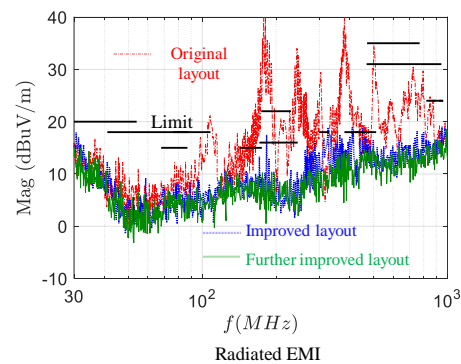

In the GaN IC-based ACF power adapter, the radiated EMI is brought into compliance after the application of the CLC filter combined with the shielding technique.

### Project III: EMI in Power Converters in Automotive Applications

EMI compliance testing of automotive power converters

In automotive power converters, the radiated EMI is brought into compliance by improving the layout of components and traces.
